Business Stagnation

What is examined: Work focus, authority, communication, visibility and long-term professional stability.

Potential supportive impact: A well-used supportive zone can improve concentration, routine, confident communication and consistency in professional work.

Possible imbalance indicators: Poor lighting, clutter or unsuitable work placement may contribute to distraction, delay, weak boundaries or inconsistent productivity.

How to Use: Place the primary desk or focused work activity in a stronger zone and measure practical changes in routine and output.

Financial Instability

Strongest Directions: North-East, South, North

What is examined: Income support, savings habits, asset growth, documentation and avoidable financial leakage.

Potential supportive impact: Orderly financial storage and activity in stronger zones can reinforce planning, record-keeping and disciplined wealth decisions.

How to Use: Use the result to position financial records, planning activity and valuable storage while also completing legal and structural checks.

Health Issues

What is examined: Natural light, ventilation, sleep quality, kitchen balance, hygiene and restorative room use.

Potential supportive impact: Balanced light, airflow, sleep orientation and clean food preparation areas can support healthier daily routines and recovery.

Possible imbalance indicators: Dampness, poor ventilation, central toilets, disturbed sleep or fire-water conflict may increase environmental stress and discomfort.

How to Use: Prioritize measurable corrections such as ventilation, leak repair, hygiene, safe circulation and sleep placement; medical care remains separate.

Flat / Office Entrance

West

Unfavorable • Score 2

Combined Status: Mixed

Apartment-Friendly Non-Structural Suggestions

These measures adapt a fixed apartment layout; they do not require moving the building or flat entrance.

Do not demolish or relocate fixed entrances solely for this report. Prioritize safety, permissions and structural integrity.

Place the work desk, seating and important storage in stronger usable zones; orient activity toward a favorable direction where practical.

Use clean lighting and the recommended colour accents to improve a weak or dark fixed zone without structural work.

Use suitable movable plants in the recommended zones while preserving ventilation, waterproofing and passage width.

Give stronger zones purposeful daily use and keep weaker zones clean, quiet and free from excess weight or clutter.

For a fixed entrance, improve lighting, visibility, cleanliness, nameplate clarity and an obstruction-free approach instead of attempting relocation.

Where the kitchen is fixed, separate fire and water, improve ventilation and adjust the cooking orientation where the counter permits.

Where the bedroom is fixed, change bed and head direction before considering civil alterations.

Use a clean compact prayer shelf in the best available North-East, East or North portion of the room.

Universal Remedies & Best Practices — Open Washbasin

Washbasin Direction: Center / Brahmasthan · Use a modest mirror carefully and ensure it does not reflect clutter, a toilet or the main entrance.

Zero Tolerance for Leaks

Use a reliable tap, tightly sealed joints and completely dry plumbing below. Repair every drip promptly; water loss is both a practical defect and a traditional symbol of financial leakage.

Balance with the Wood Element

Place one healthy Money Plant or small Bamboo beside the basin where light and hygiene permit. Living wood visually absorbs excess Water emphasis and converts the area toward growth.

Maintain Absolute Cleanliness

Keep the basin, counter, drain and surrounding tiles clean and dry when not in use. Remove stagnant water, odour and discarded toiletries immediately.

Mind the Mirror

Judge the mirror from the washbasin wall direction: North and East are preferable; South and West walls should generally avoid a large fixed mirror.

Essential Plant & Symbol Rules (पौधों और प्रतीकों के नियम)

- Avoid Thorny Plants: Do not keep thorny or spiny plants like Cactus (कैक्टस) or plants that exude milky sap (दूध वाले पौधे) inside the house, as they create tension (Stress) and block financial flow.

- Remove Dead Plants: Dead, withered, or decaying plants (सूखे पौधे) emit negative energy. Prune dry leaves regularly or replace dead plants immediately.
- Cleanliness First: Keep the area around plant pots and sacred symbols highly clean. Avoid keeping shoes, dustbins, or broken items near them, especially around Tulsi.
- Water & Sunlight: Ensure plants receive appropriate water and morning sunlight. Stagnant water in pots or trays should be cleared to prevent vastu defect (वास्तु दोष).
